No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, elec-
tronic, mechanical, photocopying, recording or otherwise, without the prior permission of the publisher.
Christine E. Ockert

Chances are, you're familiar with the concept of "character development." It's used in everything from literature to film to video games. But what exactly does it mean, and how can you incorporate it into your own writing?

Character development is the process of creating and making a character evolve throughout a story. It involves giving a character depth and complexity, as well as making them relatable to the reader. This can be done through a variety of methods, including dialogue, action, and internal monologue.

When writing a character, it's important to consider their background, motivations, and personality traits. This will help you create a character that feels authentic and engaging to the reader. In addition, you should consider how the character will change throughout the story. This will help you create a more dynamic and interesting character.

There are a few key elements to consider when developing characters. First, you should think about the character's backstory. This can include their upbringing, family background, and past experiences. This will give you a better understanding of why the character behaves the way they do.

Next, consider the character's motivations. What drives them to take action? What are they trying to achieve? Understanding these motivations will help you create a more compelling character.

Finally, consider the character's personality. Are they introverted or extroverted? Do they have a sense of humor? Understanding these traits will help you create a more realistic character.

Incorporating character development into your writing can make your story more engaging and memorable. By considering the character's background, motivations, and personality traits, you can create a character that feels real and relatable to the reader.
